

Submission Guidelines

FILE TYPES

For the best results and quickest turnaround, please provide our team with **“.ai”**, **“.svg”**, or **“.eps”** file types. If these are not available, you may provide us with **“.pdf”**, **“.png”**, or **“.jpeg”** file types, but keep in mind that these file types will slow down our process.

GUIDELINES FOR DESIGNERS

If you have access to professional designers for your artwork, please pass on these general guidelines in order to streamline your order:

- Please include vector files (**.ai** or **.eps**) when submitting designs.
- Any aspect of your design that is under **1pt** line weight may not print, and will need to be expanded.
- For readability, text should be no smaller than **10pt** height.
- For best print quality, avoid jagged edges and create smooth lines where applicable.
- Avoid clipping masks, and outline all text before sending artwork.

If you do not have access to a professional designer, our team can assist you. Reach out to **artwork@moldinggraphics.com** with any questions or requests.

1pt = 0.353 mm / 0.0139 in

Vector = a file type that can be scaled to any size without losing quality.

Registration mark expanded to **1pt**

Smooth lines (no jagged edges)

Text increased to **10pt** height
